* Type of Learning objectives (LO's):

Knowledge: what does the learner 'know' after following the training?

Skills: what is the learner able to 'do' after following the training?

Attitude: what kind of behaviour will the learner 'show' after following the training?

** Instructional strategy refers to the way you want to teach the content related to the learning objective. This can refer to:

the method of **learning delivery**; i.e. e-learning module, face-to-face training, webinar, self-study, etc

the type of **learning material**; i.e. a specific e-learning template, a specific type of (group)assignment, an animation, a handout, etc.

*** Method of assessing refers to the way you will test or assess that the learner has reached the Learning objective. This could be a i.e. MC-test, a case, an aptitude test, etc.
